Title: UTILITY ANALYST III #18221

Description:

State of New Hampshire
Office of the Consumer Advocate
Concord, NH
Utility Analyst III - Labor Grade 28
#18221

SUMMARY

To perform highly responsible professional work in researching, investigating and developing recommendations for proper utility policies, rates, economics and strategic planning, and participation in hearings related thereto; does related work as required.

RESPONSIBILITIES

Develops and supervises the development of the agency's positions on utility ratemaking issues, including economic, accounting, financial and statistical analyses.
Examines and evaluates testimony and exhibits submitted by regulated companies applying for rate changes using information from audits, written information requests, company testimony in other

cases, prior Commission orders, statutes, publications, and other sources conducts studies to recommend policy positions on economic or accounting matters.

Formulates arguments in support of, and calculates adjustments to, the revenue requirements in the company's filing; forecasts data for future test years; advises other agency analysts, attorneys and witnesses about data in company exhibits and formulation of adjustments.

Summarizes agency proposed revenue requirements, including effect of proposed adjustments; prepares testimony and exhibits; defends testimony and exhibits under oath during direct testimony and cross-examination.

Conducts studies to develop, examine and evaluate proposals by others for economic, accounting and operational changes affecting regulated utility revenue requirements; recommends adoption, rejection or alternative actions.

Maintains continuous and important contact with officials of public utility companies or their representatives, consumers, state and federal officials and special interest groups in the research of information on which utility policy, rates and strategic planning are based.

MINIMUM QUALIFICATIONS

Education: Bachelor's degree from a recognized college or university with major study in the field of business, mathematics, finance, economics, or engineering. Each additional year of approved formal education may be substituted for one year of required work experience.

Experience: Six years' experience in the analysis, regulation or management of public or private corporations or the operational phases of public utilities, two years of which shall have been dealing with rate analysis or one year of which shall have been at a public utilities regulatory commission.

RECOMMENDED WORK TRAITS

Knowledge of public utility operations. Knowledge of the laws and regulations pertaining to the operation and regulation of public utilities. Knowledge of engineering, economics and financial principles and practices in the field of public utilities. Knowledge of the accounting and engineering factors involved in rate structure determination. Ability to investigate and analyze difficult technical and public relations problems. Ability to prepare reports and/or exhibits in the development of

investigations and analyses. Ability to establish and maintain effective working relationships with state and local officials, utility representatives and the public. Must be willing to maintain appearance appropriate to assigned duties and responsibilities as determined by the agency appointing authority.

In order to receive credit for post-secondary education, a copy of official transcripts with a seal and/or a signature **MUST** be included with this application.
